

# QX600 DROPLET DIGITAL PCR SYSTEM

With more colors for greater  
multiplexing capabilities

Droplet Digital PCR delivers ultra-sensitive, absolute quantification of nucleic acids providing the ability to easily analyze targets that often fall below the detection threshold of other technologies.

**The new QX600 delivers best-in class performance for which Droplet Digital PCR systems are known, plus:**

- Six-color multiplexing to maximize targets per well
- An efficient workflow that provides same-day results
- User-friendly, intuitive software for rapid data analysis
- A technology proven in over 6,300 publications covering a vast spectrum of applications
